

## Policy on Site Visits During Public Health Emergencies

Beginning Fall, 2022, ACPEinc will conduct site visits that conform to the policy and procedures of the program being reviewed. Programs that are fully back to in-person sessions (including supervision, seminars, and committee/faculty meetings) will have an in-person site visit team. Programs that have continued to function primarily through virtual technology will have site visits conducted primarily through virtual observation. Mixed models will call for mixed site visit procedures with the exception that an in-person site visit to address issues that cannot be accessed through technology will be required (again, due to conditions on the ground, programs may need to remain on Provisional status until an in-person review is possible).

Adopted by the Board of Trustees 20200328; revised 20220517
